A New Look at Infectious Diseases (1974)

Infectious diseases remain as much a medical challenge as ever, and the articles collected in book form under the title *A New Look at Infectious Diseases* covers many aspects of diagnosis and treatment. The widespread use of immunization, with its occasional hazards, the use of newer antibiotics, and increased risk of spread by travel are all dealt with, as well as the problems of diagnosis produced by present day doctors' unfamiliarity with many diseases which were formerly so common and widespread.

Price £2.00 (U.S.A. $6.00)

Cardiovascular Diseases in the Tropics (1974)

The book presents the present state of knowledge regarding many conditions previously thought to be peculiar to the temperate and developed countries and also deals with those disorders peculiar to the tropical situation. It provides an up-to-date review suitable both for clinical and epidemiological work and for further research into these disorders.

Price £4.50 (U.S.A. $13.50)

Medicine in Old Age (1974)

The series of twenty two articles published in the *British Medical Journal* throughout the winter have been collected in book form as a convenient source of reference for general practitioners. The emphasis is on remedial mechanisms, and the use that can be made of psychogeriatric and social services in keeping the elderly healthy and relatively independent members of the community.

Price £2.00 (U.S.A. $6.00)

Today's Drugs/3 (1973)

The third and final volume of the 'Today's Drugs' series, like its predecessors, is based on *BMJ* articles revised and brought up to date by their authors. It deals with respiratory agents, drugs acting on the central nervous system, and a miscellaneous group of drugs.
